empanneling that body, but as this is the Fourth of July

the court will merely sit for a few moments, (as they are obliged to do so by law,) and immediately adjourn without transacting any business whatever.

During the July term several grave cases of felony will be tried, comprising, as usual, numerous once of attempt to hill, burglary, robbing, false pretences, forgery, grand largeny, and rioting.

lareeny, and rioting.

The Tammany Hall rioters, whose sentence was po poned some three or four times, will probably receive the judgment of the court during this term. We anticipate, however, some difficulty in relation to the sentencing of these offenders, as their counsel, Mr. Coehrane, will possibly endeavor to postpone their sentence until August or September, on the ground that the City Judge has no power alone to sentence prisoners who were tried and convicted before him and two aldermen.

The City Judge will come to court fully prepared on the

point whether he has the right or not to sentence perrons convicted before him and two aldermen, and whether it is necessary that the same court before whom they were tried should be present to seatence them.

Among other cases of importance that will be tried in

this court this term will be that of the Eleventh ward rioters who came so near killing some of our policemen in a dreadful affray in that ward about three weeks ago. The calendar this term is not as full as on other occasions, but still the amount of crime inscribed on it is very arge. The grand jury during the last term labored very hard, notwithstanding many inconveniences they had to suffer. If the grand jury which will be empannelled this soffer. If the grand jury which will be empannelled this week should devote all their time to business they will find more work on hand than they anticipated, as it is believed that the insecure and slight manner in which teneneut houses and now built will be brought under their notice. Friday evening's storm proved the structure of more than one house in the Eighteenth ward to be very weak and inefficient.

This being Judge Besbe's regular term for presiding, he will perform that duty, notwithstanding he has occupied the judgment seat for the last four months.

OPERA IN CASTLE GARDEN.-The public of New York will be pleased to see the announcement that Max Ma-retzek has organized a company, comprising the most eminent artistes in the country, and that Italian opera is to be given in Castle Garden from next Monday, 11th July, up to the 24th of August. The troups numbers Sontag, effanone, Bertucca, Patti, Pico, and Costini, among the ladies, and among the male portion of the artistes are Salvi, Vietti, Pozzolini, Marini, Rovere, Rocco, Beneventano, &c.

Foro in Boston.—The charming senorita, who attracted

such great notice in New York during her first engagement at Niblo's, is now in Albany, where, by ber beauty and talent in the dance, she has captivated all beholders. The critics speak of her in the highest terms of admiration.

THE STRAMSHIP SHERRA NEVADA, Capt. Blethen, is in the New York and California line, and runs from San Francisco to San Juan del Sud, not to Panama, as stated on Friday, in mentioning the presentation to Capt. Blethen.
LAUNCH OF THE CLIPPER SHIP WIDE AWARE.—Messrs. Peynie, Patterson & Stack launched from their yard at Wilplamsburg, on Saturday afternoon, the clipper ship Wide Awake. She is a beautifully modelled vessel of about 960 tone burthen, destined for the California and China trade. Messrs. Siffkin & Ironaldes are her owners.

New York, May 31, 1853.—The Directors of the Association for the Exhibition of the Industry of all hattons, give notice that the Exhibition will be opened or the 19th day of July.

In making this announcement, the Directors avail them selves of the opportunity to state that the building which they have erreted, and the Exhibition which shoy have prepared will, they believe, fully meet the just expectations of the gublie.

It is proper that it should be known that, in order to atford ample scope for the inventive talent and skill of our countrymen in machinery and agricultural implements, we have nowneased the size of the building by adding nearly one-fourth to its area, beyond what was originally contemplated so that we have now for the purposes of exhibition two handred thousand square feet, or nearly five zeros.

Not limiting their plants to a display merely curious or attractive, the Directors have organized a department of minoralogy and geology, in which some of the best scientification is thus laid of a most varuanic national collection of the mineral resources of the country.

The Directors had hoped to open the Exhibition at all caller period, but the hovelty and intricacy of the style or construction and the high standard of architectural leanity which it has been the object of the Association to actain, have produced delay, and it has been impracticable for the Directors at the carries the opening at an earlier day.

In regard to the general character of the exhibition, the

teer most earnest desire, to announce the opening at an arriber day.

In repard to the general character of the exhibition, the scalt premises to be most gratifying, and not unwerthy of the each type mises to be most gratifying, and not unwerthy of the eoudidence manifested towards it by the government of the United States, a confidence which has elicited a cordial excoonse from the governments of foreign countries. It ill anquestionably, be the most attractive and interesting collection of the works of ark the results of science and no productions of industry that has ever yet been made in his country, and will tend to increase the active exultation of the are in every branch of intellectual development. The sole charge of the interior of the building, its division transaments, classification and police, has been confident over of the Nayo of the United States, Captains S. Fupont and C. H. Davis; and the sanction of the government gives to the appointment of these genilemen, whe are so much distinguished themselves in the special sortices in which they have been employed, afords proof of the confidence reposed and the interest folt, by the highest utherities of the country, in the general objects of the noterprise.

These gentlemen have organized their department as fol terprise. These gentlemen have organized their department as fol

FINANCIAL AND COMMERCIAL.

BONEY MARKET. SUNDAY, July 3-6 P. M.

At the adjournment of the first board of brokers yes terday the stock market was particularly dull. The great anxiety on the part of operators and speculators appeared to be to get out of town the greatest distance is the shortest possible time. Small carpet bags were in demand, and individuals were seen with them in hand, passing from Wall street, and other business portions of the city, to the various outlets leading into the country. All were evidently seeking some quiet, romantic retreat, away from the continual din and turmell of the city, where they could, even if but for a brief period, forget the excitaments of stock speculations generally, and the evils and annoyances of the Fourth of July in New York in particular. The board of brokers has been thioning out for several days mast and we must expect dull times throughout the shortest possible time. Small carpet bags were in days past, and we must expect dull times throughout July. The weather has been so oppressive that the disposition to operate in the fancies has been daily decreasing. But for the season being unfavorable, we might look for some considerable activity in the market. Money is abundant, and likely to be more so as the period for active shipments of our staple products approaches. The political affairs, of Europe have for some time past threatened difficulties, and hostilities may yet be the re-sult; but we doubt if the effect of an open rupture be tween the great European powers would be of that un-favorable character on this side of the Atlantic many anticipate. It would give additional impetus to the circulation of foreign capital in our public securities, and give our mercantile marine more emplysecurities, and give our mercantile marine more emplyment at better prices. We have everything to gain and comparatively little to lees by any political emsute that may spring up in Europe. Our position, financially, commercially and politically, is too strong, too imprognable, to be shaken by the movements of any or all the other great nations of the earth. It is possible that for a time, in the early part of hostilities, there might be a slight ponic among capitalists, and a desire among the commercial classes to contract their mercantile operations might appear, but it would soon give way to a feeling of greater confidence, and we should with recewed activity, enter the field of commerce a more powerful rival than ever.

CARD.—IN CONSEQUENCE OF THE VARIOUS ARticles which have recently appeared in the public prints, the Directors of the Pacific Mail Steamship Company deem is incumbent on them to announce that they have not authorized any combination, with any party, for the purpose of establishing higher rates of freight and passage money between the Atiantic ports and California; nor do they contemplate any such combination, their object being to comfine their attention solely to their own business, and to the transportation of passengers and specie in the safest and cheapest manner practicable. The time consumed by land carriage across the Istimus of Panama has been lengthened by the greatly increased bulk of the mails, and the measures necessary for the safeguard of the specie. A remedy for this will be provided by the carly completion of the Panama Railroad, and with this consequent saving of time the Directors have always anticipated a reduction in cost of freight and passage between California and Atlantic ports. By order of the Board of Directors.

SECURITY OF PASSENGERS.—STEAMBOAT LAW.—
The undersigned is prepared to furnish fenders, made of early and envises of sufficient buoyant power to enable steemboat owners to convert the wood boats in use into life boats, to comply with the steamboat law. It is well known that India rubber floats possess but little merit for such a use, from their great liability to be punctured, or sven destroyed by beat. While the cork fonder is not affected in like manner, the buoyancy depending upon the lightness of the cork, not upon air, as is the case with India rubber. The cork fenders are more reliable, durable and economical, and have been tested for years past on the government surf boats, and in the mercantile marine and Collins steamers. They can easily be repaired by ordinary seamer. The cost is less than one half the India rubber. All orders circeted to the undersigned will be pusatually attended to. B BENNETT, 304 West street, Now York.

TO INDIA RUBBER MANUFACTURERS.—YOU ARE hereby notified that William Judson has no authority to set as my attorney, or to give any licensee for the use of my patent for improvement in the manufacture of India rebbier, originally dated August 31, 1880; and extended August 31, 1880, for a further term of seven years, and that I are under no obligation to ratify anything that he has done in my name.
